Privacy Policy

SPERT® Suite Web Applications

Version 1.4 · Effective Date: October 26, 2026

Operator: famousdavis, LLC (a Florida limited liability company)

This Privacy Policy describes how famousdavis, LLC, a Florida limited liability company operating under the SPERT® Suite brand ("Operator," "we," "us," or "our"), collects, uses, and handles information in connection with the SPERT® Suite web applications (SPERT® Scheduler, SPERT® Story Map, SPERT® Forecaster, SPERT® CFD, GanttApp™, MyScrumBudget™, and SPERT® AHP) and associated cloud storage features (collectively, the "Apps" or "Services").

1. Scope and Applicability

This Privacy Policy applies to information collected through the Apps when you use the optional Cloud Storage feature. Core App functionality that does not use Cloud Storage keeps your project data entirely within your local browser; the Apps do not send project data to the Operator or any third party. As with any website, when you load the Apps our web hosting provider (Vercel Inc.) receives standard request information, such as your IP address and browser type, in order to deliver the pages. Except as described in the following paragraph, this Privacy Policy does not otherwise apply to local-only use.

The optional AI Connectivity feature ("Connect AI") is an exception, and applies regardless of your storage setting. If you enable Connect AI and turn on Read Mode, a copy of the project you have open is uploaded to the Operator's cloud relay and transmitted to your chosen AI provider — **even if you otherwise use the Apps with local browser storage only.** Sections 2.5 and 4.5 of this Policy describe that handling, and the AI Privacy Notice at spertsuite.com/ai-privacy supplements this Policy in full with respect to that feature. Users who do not enable Connect AI are unaffected.

1.1 Change of Operator (September 2026)

Effective September 12, 2026, the SPERT® Suite business was transferred from the sole proprietorship of William W. Davis, MSPM, PMP to famousdavis, LLC, a Florida limited liability company. famousdavis, LLC is now the Operator of the Apps and is the entity responsible for the personal information described in this Policy.

This is a change of legal entity only. It does not change what information is collected, where it is stored, which service providers process it, how long it is retained, or any right you hold under this Policy. Cloud Storage data remained in the same Firebase project throughout, under the same access controls, and was not moved to new infrastructure or disclosed to any additional party as part of the transfer. The posting of this Policy is the notice contemplated by Section 4.4 (Business Transfers).

2. Information We Collect

2.1 Account Registration Information

When you create an account to use Cloud Storage features, Firebase Authentication collects and we receive only the following personal information:

- Your name (as provided by your Google or Microsoft account)
- Your email address (as provided by your Google or Microsoft account)
- The link to your profile photo, if your Google or Microsoft account supplies one (we store the link, not the photo itself)

No other personal information is collected during account creation. We also keep a record of the version of the Terms of Service and Privacy Policy you accepted and when, which sign-in provider (Google or Microsoft) you used, and the App in which you first accepted them. Each time you sign in, or open an App while signed in, the App updates a profile record holding your name, email address, and profile photo link, together with the time of that update (see Section 2.6). We do not collect phone numbers, physical addresses, payment information, job titles, or organizational affiliations as part of authentication. Authentication is supported exclusively via Google Sign-In and Microsoft Sign-In (including Microsoft Entra ID / Azure AD organizational accounts).

2.2 User-Generated Data Stored in Cloud Storage

When you use Cloud Storage features, we store the data you choose to save within the App. This data is limited to project management planning information such as:

- Effort estimates and three-point estimate values
- Story point counts, velocity data, and sprint parameters
- Task names, backlog item labels, and iteration names
- Project structure and schedule metadata

We do not intentionally collect, and you are expressly prohibited from storing, personally identifiable information of third parties, protected health information, payment card data, government identification numbers, or other sensitive or regulated data. See Section 5.3 of the Terms of Service.

2.3 Technical and Usage Data

Firebase (operated by Google LLC) automatically collects certain technical information as part of its infrastructure operation, including:

- IP address at the time of authentication and data access
- Browser type and operating system (from standard HTTP headers)
- Timestamps of data reads and writes

This technical data is collected by Google’s Firebase infrastructure in the ordinary course of operating the service and is subject to Google’s privacy policies. Firebase Authentication keeps the IP addresses it logs for a few weeks.

We use Google Firebase for authentication and cloud storage. Firebase automatically collects the technical data listed above. For details on Google's data practices, including any processing Google performs for its own purposes, see https://firebase.google.com/support/privacy and https://www.google.com/policies/privacy/partners/.

Operational logs generated by the Operator's Google Cloud services (for example, request metadata such as IP address, timestamp, and requested URL) are retained for 30 days in Google Cloud Logging, whose default storage location is not restricted to a specific country or region. These logs are used only to operate, secure, and troubleshoot the Services.

2.4 Information We Do Not Collect

We do not collect:

- Payment card information or billing data (handled exclusively by Stripe, if subscription payments are implemented)
- Social Security numbers, government-issued identification, or financial account information
- Phone numbers, physical addresses, job titles, or organizational affiliation
- Location data beyond IP-level geolocation collected automatically by Firebase infrastructure
- Any data from the local-only (non-Cloud Storage) use of the Apps (other than the standard web-hosting request information described in Section 1)
- Any personal information beyond name, email address, and profile photo link obtained through the authentication provider, other than as described in Sections 2.1, 2.6, and 2.7

2.5 AI Connectivity Session Data

When you enable the optional AI Connectivity feature ("Connect AI"), a temporary anonymous session is created in Google Firestore to serve as a relay channel between your AI assistant and your browser. During an active AI session, this relay holds: (a) a randomly generated session identifier with no connection to your name, email address, or account; (b) AI-generated content in transit to your browser, in applications that offer Write Mode and where it is enabled; (c) a snapshot of your project content when Read Mode is enabled and you have separately consented to that mode; and (d) session activity timestamps used to manage automatic expiry.

Read Mode uploads a copy of the open project regardless of whether you use Cloud Storage or local browser storage only. Anonymous session data is not associated with your name, email address, or any SPERT® account unless you are signed in with a cloud account. Relay session data expires seven (7) days after the session's last activity, including requests from your AI assistant, and is then deleted from the live relay by an automated process, typically within 24 hours of expiry; it is deleted sooner when you disconnect or sign out (if the App cannot reach the relay at that moment, deletion waits until a later attempt succeeds or the session expires; see Section 6 of the AI Privacy Notice), and the Read Mode snapshot is deleted when you turn Read Mode off. Copies may remain in the Operator's database backups until they expire (see Section 6). When Read Mode is enabled, project content transmitted through the relay is also shared with your chosen AI provider; see Section 4.5 and the AI Privacy Notice at spertsuite.com/ai-privacy for details.

2.6 Project Sharing and Invitations

Project owners can share a project with collaborators by email address. If the address matches an existing SPERT® account, that person is added to the project with the role the owner chose, and we send them a notification email. Otherwise we create an invitation record and email the invitee a link. An invitation record contains the invitee's email address, the inviter's name and email address, the project identifier and name, the role granted, and timestamps. Invitations expire 30 days after they are sent. Invitation emails are sent through Resend (see Section 4.6).

Invitation records remain in our database after they are accepted, revoked, or expired until the Operator purges them, and deleted records may remain in database backups until they expire (see Section 6). To make this feature work, each app stores a profile record (such as your name and email address) in a shared profile collection when you sign in.

2.7 Contact and Support Messages

If you submit a form on spertsuite.com, such as the contact, feature-request, or training form, your name, email address, message, and any apps you select are sent to Formspree, which delivers them by email to the Operator's spertsuite.com mailbox (see Section 4.6). That mailbox is hosted by Microsoft, and email you send directly to an address at spertsuite.com is received and stored in the same mailbox. We use these messages only to respond to you and keep them in that mailbox for as long as needed for that purpose. Formspree may retain a copy under its own privacy policy.

3. How We Use Information

We use the information collected solely to:

- Provide, operate, and maintain the Cloud Storage features
- Authenticate your identity and secure your account
- Respond to support requests or account inquiries
- Comply with applicable legal obligations

We do not use your data for advertising, marketing profiling, behavioral analytics, or sale to third parties. The Operator does not use your data to train machine learning models. Content you choose to share with an AI provider through Connect AI is governed by that provider's own policies; see Section 4.5. We do not monetize your data in any way.

4. How We Share Information

We do not sell, rent, or trade your personal information. We share information only in the following limited circumstances:

4.1 Google Firebase / Google Cloud

Cloud Storage data is stored in a Firebase/Firestore database hosted on Google Cloud infrastructure operated by Google LLC. Google processes data on our behalf as a service provider subject to Google's data processing terms. For information about Google's data practices, see https://firebase.google.com/support/privacy and https://policies.google.com/privacy.

4.2 Stripe (if applicable)

If subscription payments are implemented, payment processing is handled by Stripe, Inc. The Operator does not receive or store payment card details. Stripe's privacy policy governs data collected during payment processing and is available at https://stripe.com/privacy.

4.3 Legal Requirements

We may disclose information if required to do so by law, court order, or governmental authority, or if we believe in good faith that disclosure is necessary to protect the rights, property, or safety of the Operator, users, or the public.

4.4 Business Transfers

In the unlikely event of a sale, merger, or transfer of assets involving the Operator's business, user information may be transferred as part of that transaction. You will be notified of any such transfer via updated Terms and Privacy Policy.

The September 2026 transfer of the SPERT® Suite business from the Operator's predecessor sole proprietorship to famousdavis, LLC was a transfer of this kind, and this Policy is the notice of it. See Section 1.1.

4.5 AI Provider (AI Connectivity Feature)

When you enable Read Mode within the AI Connectivity feature, a snapshot of your project content is transmitted to your chosen AI provider (such as Microsoft, Anthropic, or OpenAI) as part of the AI tool call. The Operator transmits this content solely to enable the AI Connectivity feature as you have requested. The Operator does not control, and has no responsibility for, how your chosen AI provider receives, stores, uses, or retains this content. Your AI provider's own terms of service and privacy policy govern their handling of content transmitted to them.

You are solely responsible for selecting an AI provider appropriate for the content you share and for confirming that your use of that provider complies with any applicable organizational, legal, or regulatory requirements. The AI Privacy Notice at spertsuite.com/ai-privacy contains provider-specific guidance and a full description of AI Connectivity data flows.

4.6 Other Service Providers

The Operator uses the following additional service providers, each of which receives only the information described in the Section indicated and handles it under its own terms and privacy policy: Vercel Inc., which hosts the Apps' web pages (Section 1); Resend, which delivers invitation emails (Section 2.6); Formspree, which delivers messages submitted through the website's forms (Section 2.7); and Microsoft, whose Exchange Online service receives and stores email sent to SPERT® Suite addresses at spertsuite.com (Section 2.7).

5. Data Security

The Operator utilizes the native security features of Google Firebase to protect your data, including:

- Firebase Authentication for account access control and identity verification

- Firestore Security Rules that logically isolate each user's data by Firebase Authentication UID, preventing any user from accessing another user's stored data (except projects an owner has chosen to share with invited collaborators)
- HTTPS encryption for all data in transit
- Google Cloud's infrastructure-level security controls

The Operator's security obligations are limited to the proper configuration of these Google Firebase tools and services. The Operator is not responsible for security failures inherent in the Google Cloud platform, for vulnerabilities introduced by Google infrastructure updates, or for breaches occurring at the infrastructure level beyond the Operator's reasonable control.

HOWEVER, NO METHOD OF ELECTRONIC TRANSMISSION OR STORAGE IS 100% SECURE. WE CANNOT GUARANTEE ABSOLUTE SECURITY OF YOUR DATA. YOU USE CLOUD STORAGE AT YOUR OWN RISK, AS FURTHER DESCRIBED IN THE TERMS OF SERVICE. We are not responsible for security breaches attributable to your account credential compromise or factors outside our reasonable control.

5.1 Data-Breach Notification

In the event of a security incident that compromises personal information, we will investigate promptly. If we determine that the incident creates a material risk of harm to affected users, we will notify them by email or in-app notice and, where required by applicable law, notify relevant regulators within the timelines mandated by statute. We maintain no obligation to provide credit monitoring or other remediation services beyond such notification.

6. Data Retention

We retain Cloud Storage data for as long as your account remains active. You may request deletion of your account and all associated Cloud Storage data at any time using the contact form at spertsuite.com/contact, or by emailing privacy@spertsuite.com. Account deletion is performed by the Operator; the Apps do not currently provide a self-service account-deletion control. Upon request, your data will be deleted from the Firebase database within a commercially reasonable period, not to exceed thirty (30) days under normal circumstances. Deleted data is removed from the live database as described above. Copies may remain in the Operator's database backups until they expire: up to 98 days for daily backups and up to 7 days for point-in-time recovery data. Backups are stored in the same United States location as the live database, are used only to recover the Services, and are not available to you as a restore service. After your account is deleted, Firebase Authentication, which Google operates, may keep the deleted account's sign-in information in Google's live and backup systems for up to 180 days before removing it.

7. Your Rights and Choices

Depending on your location and applicable law, you may have the following rights with respect to your personal information:

7.1 Access and Portability

You may request a copy of the personal information associated with your account by contacting us at privacy@spertsuite.com. App data stored in Cloud Storage is accessible and exportable directly within each App.

7.2 Correction

Your name and email address come from your Google or Microsoft account. To correct or update the personal information associated with your account, contact us at privacy@spertsuite.com.

7.3 Deletion

You may request deletion of your account and all associated Cloud Storage data at any time using the contact form at spertsuite.com/contact, or by emailing privacy@spertsuite.com. Deletion is performed by the Operator on request; the Apps do not currently provide a self-service account-deletion control. We will process deletion requests within a commercially reasonable time, not to exceed thirty (30) days under normal circumstances.

7.4 Opt-Out of Cloud Storage

You may discontinue use of Cloud Storage at any time and continue using the Apps with local browser storage only. Disabling Cloud Storage does not delete previously stored data; to remove stored data you must request account deletion as described in Section 7.3.

7.5 California Residents (CCPA)

If you are a California resident, you have the right to know what personal information we collect, request deletion of your personal information, and opt out of the sale of your personal information. We do not sell personal information. To exercise your rights, contact us at privacy@spertsuite.com.

7.6 European and UK Users (GDPR/UK GDPR)

If you are located in the European Economic Area or United Kingdom, you have rights under applicable data protection law including rights of access, rectification, erasure, restriction, portability, and objection. For the purposes of the GDPR and UK GDPR, famousdavis, LLC is the Data Controller of your personal information. Our lawful basis for processing your account and Cloud Storage data is the performance of the service you have requested (Article 6(1)(b) GDPR). Where processing is based on your consent, you have the right to withdraw that consent at any time without affecting the lawfulness of processing based on consent before its withdrawal. To exercise any of your rights or to lodge a complaint, contact us at privacy@spertsuite.com. You also have the right to lodge a complaint with your local supervisory authority.

7.7 Cookies and Local Storage

The Apps use essential browser cookies and local storage solely to maintain your authentication session when Cloud Storage is enabled. These cookies cannot be disabled without also disabling Cloud Storage functionality. You may delete them at any time via your browser settings, which will simply sign you out of Cloud Storage but will not affect core App functionality. We do not use tracking cookies, advertising cookies, or any cookies that monitor your behavior across other websites. Users who do not enable Cloud Storage will not have any authentication cookies set.

8. Children’s Privacy

The Apps are not directed to children under the age of 13 in the United States (or under 16 in the EEA/UK where applicable). We do not knowingly collect personal information from children. If we become aware that a child has provided personal information, we will promptly delete it. If you believe a child has submitted information to us, contact us at privacy@spertsuite.com.

9. International Data Transfers

The Apps are operated from the United States. Cloud Storage data and AI Connectivity relay data are currently stored at rest in the United States (Google Cloud Firestore multi-region nam5), and the Operator will give notice by updating this Policy before changing that location. This describes where data is stored at rest; Google's authentication, security, and support operations are provided under Google's terms and may involve processing elsewhere, and operational logs (Section 2.3) are not restricted to a specific location. If you access the Services from outside the United States, your data will be transferred to and processed in the United States. By using Cloud Storage, you consent to the transfer of your information to the United States, which may have different data protection laws than your country of residence.

10. Third-Party Links

The Apps may contain links to third-party websites or services. This Privacy Policy does not apply to those third-party sites. We encourage you to review the privacy policies of any third-party sites you visit.

11. Changes to This Privacy Policy

We may update this Privacy Policy from time to time. Material changes will be communicated by posting the updated Policy within the Apps and updating the Effective Date above. Your continued use of Cloud Storage features after the updated Effective Date constitutes your acceptance of the revised Policy.

12. Contact Us

If you have questions, concerns, or requests regarding this Privacy Policy or our data practices, please contact:
